Project portfolio

Chemical recycling of mixed plastic waste

- World first renewable aromatics plant
- Demonstrating the BioBTX technology at industrial scale
- A facility with a capacity of 50kton mixed plastic waste (input annually)
- Generating a profitable business case
- Operational in 2024

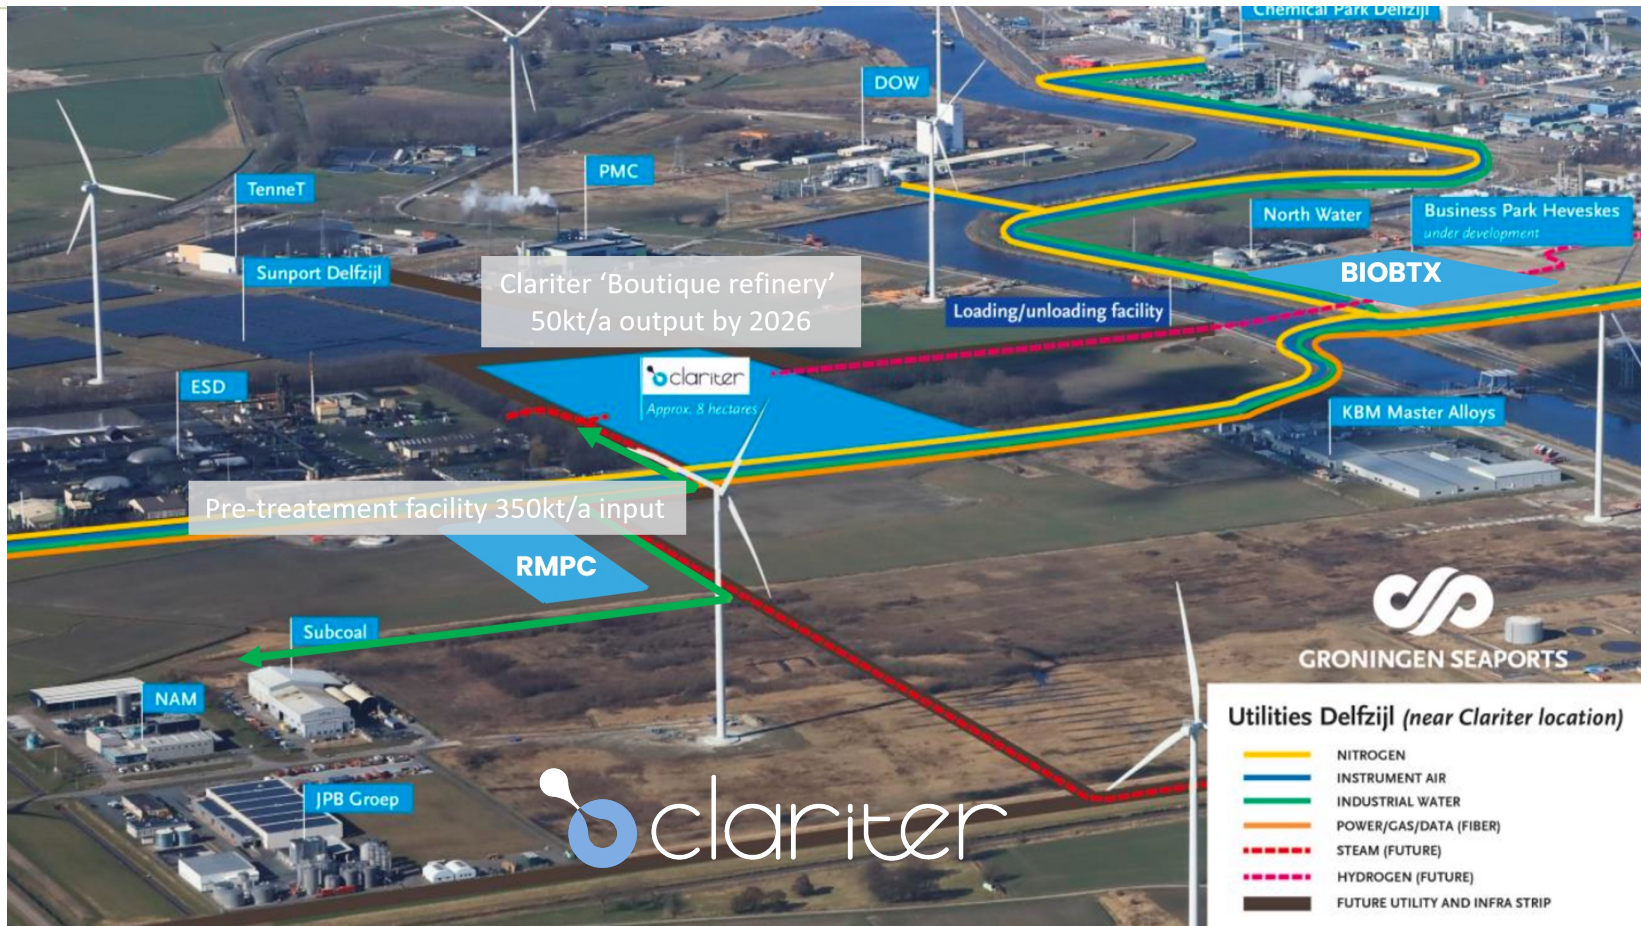

Emmen spil in Europees netwerk voor recyclen kleding dankzij Cure Technology

Wereldwijd verdwijnen jaarlijks miljarden kilo's kleding in de verbrandingsoven. Dat moet anders. Recycle fabriek CuRe Technology uit Emmen wordt een van de hoofdrolspelers in een Europees project om kleding in te zamelen en te recyclen tot opnieuw te gebruiken garen.
